Event happens simultaneously in 11 countries and 7 Brazilian cities.

Supera Park Innovation and Technology Park is one of the supporters of the Pint of Science - international festival of scientific diffusion, that happens between May 23th and 25th, in Ribeirao Preto. The event happens simultaneously in 11 countries and should gather scientists and researchers in restaurants, cafes and bars with the intention to share knowledge with the population.

In Ribeirao Preto, the activities will happen concurrently in three breweries: Invicta, Cervejarium and Lund. "This is an initiative that goes along with the work developed at Supera Park, that aims the diffusion of knowledge and science popularization. The breweries will host speakers that, in a relaxed way, will talk about science boarder themes, in a accessible language to the wider public", explains Dalton Marques, Supera Park manager.

In Brazil, aside from Ribeirao Preto, the festival will take place in Belo Horizonte (MG), Campinas (SP), Dourados (MS), Rio de Janeiro (RJ), Sao Carlos (SP) and Sao Paulo (SP). Brazil is the only country in Latin America participating in this initiative.

Here, Pint of Science is being coordenating by Instituto de Estudos Avançados (IEA), Centro de Pesquisas em Doenças Inflamatórias (CRID), Centro de Terapia Celular (CTC) from the University of Sao Paulo (USP). "The initiative is organized by volunteers that aim sharing with the population the daily challenges faced by scientists, the enchantments and disenchantment's", affirms João Henrique, Communication Analyst at IEA. Among the topics that will be covered by the talks realized in the breweries are: physical exercises and health, neuroscience and arts, brain simulation in computer, therapeutic potential of certain drugs, and the relation among genetics and cancer.

The participation is free of charge and there is no need to prior registration. The full scheduling and more information about the Pint of Science Brazil can be accessed on the website www.pintofscience.com.br, by phone +55 16 3315-0368, +55 16 9971-66078 or e-mail jhenrique@usp.br.

The event counts on the support of FAPESP, Neuromat and Rádio USP Ribeirão Preto and it is nationally sponsored by Elsevier.

About the Pint of Science

The first edition of the Pint of Science happened in England in May 2013. The idea arose on year before, when two researchers from the Imperial College of London, Michael Motskin e Praveen Paul, organized an meeting with other researches. In this encounter, people afflicted by Alzheimer,

Parkinson, neuromuscular disorders and multiple sclerosis, were invited to get to know the researchers laboratories and see closely the kinds of investigation they performed.

In Brazil, the first edition was held in 2015, in Sao Carlos. Besides Brazil, the other 11 countries that will participate are South Africa, Germany, Australia, Austria, Canada, Spain, United States, France, England, Ireland and Italy.
